

DIRECT VENT CAST IRON STOVES
HEAT BEAUTIFULLY

Intrepid® Direct Vent Stove in Classic Black

beauty + QUALITY

Since 1975 Vermont Castings has been handcrafting beautiful, efficient heating products, right in the heart of Vermont. Now sold around the world, our stoves and inserts are known for performance, durability and stunning good looks. Our direct vent gas stoves offer the same quality and reliability of a classic Vermont Castings wood burning stove without the hassle and mess of a real wood fire, so you can add Vermont casted beauty and heat to your home effortlessly. Vermont Castings direct vent stoves are available in three sizes, three gorgeous enamel finishes and the traditional Classic Black; there is sure to be a size and style just right for you.

RADIANCE®

The Radiance® features a four piece Split Oak style log set and ceramic burner. Unlike the steel pan burners used in inferior products, our ceramic burner ensures a beautifully realistic ember bed and superior flame movement. The largest of our direct vent stoves, the Radiance® combines superior heat and quality cast iron construction into one gorgeous stove, designed to be centerpiece of any room.

HEAT UP TO 1,500 SQUARE FEET

The Radiance® direct vent stove delivers up to 38,000 BTUs of heating power to help keep your space warm and cozy season after season.

CONVENIENT WARMING SHELVES

Stylish yet practical, warming shelves beautifully accent the stove's bold styling. Plus, they're the perfect spot to warm mittens on cold winter days. Add one or two to complete your stove.

WARMING SHELVES

STARDANCE®

Slightly smaller than the Radiance®, the Stardance® model offers the same great design, combining flexible installation and efficient heating into one convenient package.

MORE VERSATILE INSTALLATION OPTIONS

The Stardance® allows you to install it almost anywhere. With 4" clearance from the back and sides, and 28,000 BTUs of heat, this stove is a great option for small spaces.

EFFICIENT HEAT FOR YOUR HOME

Like the Radiance® and Intrepid®, the Stardance® makes efficient use of either natural or liquid propane gas. With a steady state efficiency rating of 81%, you're sure to get the most out of your fuel dollars.

INTREPID®

Smaller in size but rich in cast iron detail, the Intrepid® direct vent stove delivers reliable and efficient gas heat that's perfect to take the chill off any room.

EASILY BLEND WITH YOUR DECOR

The Intrepid®, along with the Radiance® and Stardance®, is available in three beautiful enamel colors and the most popular finish, Classic Black. Add matching warming shelves to complete the look.

MAKE THE MOST OF YOUR STOVE

Add an optional fan kit to efficiently move heat around your room. The variable speed, heat activated fan maximizes the 18,5000 BTUs of heat generated by the Intrepid®.

Stardance® Direct Vent Stove in Majolica Brown

Safety First

Because our stoves were designed to deliver maximum BTUs to provide the best heating solutions for your home, the units will become hot to the touch. Consequently, all Vermont Castings direct vent stoves come standard with a certified safety barrier. The screen barrier, custom made to fit each direct vent model, affixes to your stove and has been approved by a third party testing agency to conform to specific standards designed to prevent injury from hot glass.

Ultimate Comfort, Ultimate Control

Found on the Radiance and Stardance, the Total System Control modulates the fan and flame height with one hand held remote. The TSC remote features LED backlighting, temperature display, ON indicator, low battery indicator, thermal shutdown and childproof lock.

- Heat activated, variable speed fan included
- Three level flame height and fan speed
- Fan system has ON/OFF timed delay for the most efficient heat output.
- In thermostat mode the system shuts off once the desired temperature is met for maximum efficiency.

Stardance® Direct Vent Stove in Majolica Brown

RCSITEA remote included on the TSC models

CLEARANCES

Minimum clearances to combustible materials in inches. Maintain clearance (empty space) between combustible materials and the heater as specified below for the appropriate model.

INSTALLATION: Normal Clearance Requirements	Radiance®	Stardance®	Intrepid®
(A) TO CEILING	72" (1830 mm)	72" (1830 mm)	72" (1830 mm)
(B) TO SIDE WALL	6" (150 mm)	4" (102 mm)	2" (51 mm)
(C) TO REAR WALL	4" (102 mm)	4" (102 mm)	4" (102 mm)
(D) MAX ALCOVE DEPTH	48" (1220 mm)	48" (1220 mm)	48" (1220 mm)

Vermont Castings direct vent gas stoves must be installed on rigid flooring. When the heater is installed directly on any combustible surface other than wood flooring, a metal or wood panel extending the full width and depth of the unit must be used as the hearth.
